

Pocket Radar™

Pocket Radar™

Pocket Radar™ is a pocket-sized basic speed radar gun for use when measuring anything in motion for over 1 second. You decide what to measure and when to accurately monitor the speeds of vehicles, radio-controlled planes/cars, runners, and any other moving objects.

Neighborhood Street Safety

Discreetly measure the acceleration and deceleration of cars, vehicles, and bikes. Speed measuring device for concerned citizens interested in neighborhood safety.

Convenient Handheld Size

Pocket Radar™ easily fits all the best radar gun features in the palm of your hand. It's pocket-sized, lightweight, and easy to store.

Speed of Athletes

The Classic model is the preferred radar gun used to measure the acceleration and deceleration of athletes (animals included) running.

Sports

See the peak speed for: running/sprinting, ice skating, bicycling, skiing, skateboarding, and many others, including winter sports.

Hobbies

Discover the top speeds of radio-controlled cars, planes, boats, and many more.

Units of Measure:

- Miles Per Hour (MPH)
- Kilometers Per Hour (KPH)
- Meters Per Second (MPS)
- Feet Per Second (FPS)

Measurement Modes:

- Snapshot
- Repeating (3/4s)

Recall Memory: 10

Power Options: AAA Batteries (x2)

Battery Life:

- >10,000 Readings (High-Drain Alkaline Batteries—included)
- >20,000 Readings (NiMH Rechargeable Batteries—not included)

Speed Range:

- 7MPH to 375MPH (11KPH to 600KPH)
- 10FPS to 550FPS (3MPS to 168MPS)

Accuracy:

- ±1MPH (±2KPH)
- ±2FPS (±1MPS)

Measurement Range (Car): 0.5 Mile (0.8 Kilometer)

Weight: 4oz (Without Batteries)

Included Features:

- Radar
- Hard-Shell Case
- Wrist Strap
- Alkaline Batteries (x2)
- Quick Start Guide

Warranty: 1 Year

UPC: 851766002018 (PR1000)
